Subject: Sample Analysis, Valine Adducts: Series K Short Term Study

Loreen:
Attached please find from Dr. Scherer a proposal for valine adduct analysis on samples from the short term Series K study. We've reviewed the proposal and are ok to proceed with it as provided.

Sample analysis will begin after the clinical conduct, therefore, we need to have the project agreement for this work **executed no later than June 30** (clinical study conduct runs from 6/19-6/29).

Please let me know if other information is needed in order to prepare the agreement.

Thanks,
Valerie
